### **RESPONSE TO AMENDMENT**

This action is in response to the amendment filed on November 29, 2008. The abstract, specification and claims 1-10, 12-14 and 16 have been amended. Claims 1-10 and 12-18 remain pending.

The substitute specification filed on November 29, 2008 has been approved for entry and overcomes the objections set forth in the previous Office action.

The replacement drawing sheets (1/23 - 23/23) were received on November 29, 2008. These drawings are acceptable and overcome the objections set forth in the previous Office action.

The amendments to claims 1-10, 12-14 and 16 have overcome the rejection under 35 U.S.C. § 112, 2<sup>nd</sup> paragraph set forth in the previous Office action.

The information disclosure statement (IDS) submitted on November 29, 2008 has been considered by the examiner.

Claims 1-10 and 12-18 are allowable.

### **REASONS FOR ALLOWANCE**

Applicant's arguments appearing on pages 12-18 of the response filed on November 29, 2008 regarding the distinction between the claims as amended and the prior art applied in the previous Office action have been considered and are persuasive. The rejections under 35 U.S.C. §§ 102 (a), (b) and (e) and 103(a) have been withdrawn.

The following is an examiner's statement of reasons for allowance:

None of the prior art discloses or renders obvious a transmission synchronizer which includes the relative rotation regulating structure arranged together with the remainder of the structure as specified in claim 1, and particularly wherein the relative rotation regulating structure is located between the balk ring and the synchro hub; the synchronizing support force generating mechanism is spaced apart in a circumferential direction from the relative rotation regulating structure; and the relative rotation regulating structure is adapted to regulate the relative rotation between the balk ring and the synchro hub to prevent generation of the synchronizing support force by the synchronizing support force generating mechanism while in neutral.

None of the prior art discloses or renders obvious a method of operating a transmission synchronizer including step of regulating the relative rotation between the balk ring and the synchro hub so that the synchronizing support force is not generated in a neutral position using a relative rotation regulating structure located between the balk ring and the synchro hub and spaced apart in a circumferential direction from the synchronizing support force generating mechanism, together with the remainder of the method steps as specified in claim 10.

None of the prior art discloses or renders obvious a transmission with a synchronizer which includes the relative rotation regulating structure arranged together with the remainder of the structure as specified in claim 14, and particularly wherein the synchro hub and the balk ring form a relative rotation regulating structure on the facing surfaces therebetween to regulate the relative rotation between the synchro hub and the balk ring while in the neutral position; and the synchronizing support force generating

mechanism and the relative rotation regulating structure are spaced apart in a circumferential direction from one another.

None of the prior art discloses or renders obvious a transmission with a synchronizer which includes means for regulating a relative rotation between the synchro hub and the balk ring while in the neutral position arranged together with the remainder of the structure as specified in claim 16, and particularly wherein the regulating means are integral portions of the facing surfaces of the synchro hub and the balk ring which are spaced apart in a circumferential direction from the converting means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard M. Lorence whose telephone number is (571) 272-7094. The examiner can normally be reached on Mondays through Fridays from 10:30AM to 7:00PM.
